AEI Reaches Major Milestone, Delivering 50th B737-400SF Freighter Conversion

Miami, Florida – April 9th, 2015 – Aeronautical Engineers, Inc. (AEI) is pleased to announce that it has delivered the 50th B737-400SF 11 pallet position freighter conversion. The aircraft built in 1992 (MSN 26437) is a high gross weight B737-400 and was delivered to Ypsilanti, Michigan based Kalitta Charters. This represents an important milestone in AEI's freighter conversion history. Orders continue to remain strong as AEI has another 15 B737-400SF freighters on order for this year. The aircraft was converted at Commercial Jet's Dothan, Alabama facility.

The AEI B737-400SF is the only passenger to freighter conversion product that offers operators ten full height 88" x 125" container positions. This unique capability is achievable due to AEI's Main Deck Cargo Door location which is approximately 40" further back than the competition. The additional container position increases AEI's volumetric carrying capability by 10% which places the freighter in a class by itself.

This unique flexibility has been designed by AEI to allow cargo operators to immediately adapt to multiple ULD configurations at a moment's notice. When combined with proven reliability, the AEI Converted B737-400SF will allow Kalitta to keep their aircraft - **"In the air, generating revenue"**.

About AEI

Aeronautical Engineers, Inc. (AEI) is a global leader in the aircraft passenger-to-freighter conversion business and is the oldest conversion company in existence today. Since the company's founding in 1958, AEI has developed over 120 Supplemental Type Certificates (STCs) and has modified 400 aircraft with the STCs. AEI helps its customers extend aircraft life and increase the overall value of aircraft assets by continuously focusing on dependable and flexible product offerings. AEI currently offers passenger-to-freighter conversions for the Boeing 737-400, 737-300, 737-200 and MD-80 aircraft. Additionally, AEI will offer the market its new CRJ 200 freighter conversion in 2015, followed by the Boeing 737-800 full freighter and combi conversions in 2017. www.aeronautical-engineers.com

About Commercial Jet

Commercial Jet is an FAA and EASA approved repair station that specializes in both scheduled and unscheduled heavy maintenance, line maintenance, modification services, complete airframe inspections, freighter conversions, interior modifications, avionics upgrade programs and complete aircraft painting. The company also offers lease return services, and refitting passenger and cargo aircraft for return to market. With over half-a-million square feet (46,000 square meters) of multi-bay hangar facilities in Miami (MIA), Florida and Dothan (DHN), Alabama, Commercial Jet serves passenger and cargo airlines, owners, lessors and military customers. Their professional team services a wide variety of commercial aircraft types, including B717, B727, B737, B757, B767, DC8, DC9, DC10/MD-11, MD80/90, A320 and A300. www.commercialjet.com.
