AEI Announces Order for Three 11 Pallet Position B737-400SF Freighter Conversions for ASL Aviation Group

Miami, Florida – February 2nd, 2016 – Aeronautical Engineers, Inc. (AEI) is pleased to announce that the company has signed a deal with Dublin, Ireland based ASL Aviation Group to provide three (3) 11 pallet position B737-400SF freighter conversions. All three aircraft (MSN 25177: MSN 24917: MSN 26065) will be re-delivered to ASL in May, June and July of this year, respectively. The aircraft are being converted at Commercial Jet's Miami, FL facility.

The AEI B737-400SF is the only passenger to freighter conversion product that offers operators ten full height 88" x 125" container positions. This unique capability is achievable due to AEI's Main Deck Cargo Door location which is approximately 40" further back than the competition. The additional container position increases AEI's volumetric carrying capability by 10% which places the freighter in a class by itself.

AEI's B737-400SF shall provide ASL Aviation Group with a highly flexible Ancra CLS capable of carrying multiple ULD's including:

(10) 88"x125" ULDs in P1 to P10 or

(5) 88"x125" and (10) 61.5"x88" in P1 to P10 and

(1) 53"x88"x64" Pallet or AEP/AEH or 60.4"x61.5" AKE/LD3 or 61.5"x88"x56"H
AYY in P11

This unique flexibility has been designed by AEI to allow cargo operators to immediately adapt to multiple ULD configurations at a moment's notice. When combined with proven reliability, the AEI Converted B737-400SF will allow ASL Aviation Group to keep their aircraft – **“In the air, generating revenue”**.

About AEI

Aeronautical Engineers, Inc. (AEI) is a global leader in the aircraft passenger-to-freighter conversion business and is the oldest conversion company in existence today. Since the company's founding in 1958, AEI has developed over 120 Supplemental Type Certificates (STCs) and has modified over 400 aircraft with the STCs. AEI helps its customers extend aircraft life and increase the overall value of aircraft assets by continuously focusing on dependable and flexible product offerings. AEI currently offers passenger-to-freighter conversions for the Boeing 737-400, 737-300, and MD-80 aircraft. AEI will certify its new CRJ200 SF freighter conversion in 2016, followed by the Boeing 737-800 full freighter and combi conversions in 2017.

About ASL Aviation

ASL Aviation Group is an established and profitable aviation group, headquartered in Dublin, Ireland, which provides aviation services globally with 7 Air Operators Certificates in Europe, Africa and Asia, two support services companies and various leasing entities. It owns and operates a fleet of +/- 100 aircraft for freight and passenger transport.
