AEI COMPLETES PDR FOR CRJ200 SF AIRCRAFT

MIAMI, FL., --November 26, 2013-- Aeronautical Engineers, Inc. (AEI) is pleased to announce that it has completed the Preliminary Design Review (PDR) for the Passenger to Freighter Conversion Program for the CRJ200* SF aircraft. This milestone is significant because it establishes the basic design features of the freighter. The program was officially launched in February of 2013 and is expected to be completed by mid 2015. The modification touch labor on the prototype will begin in June of 2014 and will be performed at AEI's leading Authorized Conversion Center, Commercial Jet Inc. which is located in Miami Florida.

Mr. Roy Sandri, President of AEI stated that "The completion of the PDR is a major milestone in any conversion program as it establishes the capability and functionality of the future freighter." He went on to say: "With the key features now defined our engineering team is able to focus on the detail drawings as they quickly move towards the Critical Design Review (CDR) which is expected in March of 2014."

Key Features

- Bombardier Licensed 3rd Party STC Provider
- Eight 61.5"X88" Pallet Positions
- Up to 14,840 LB (6,731 KG) Main Deck Payload (Depending on Model & Aircraft Weight Limits)
- 94"X77" Main Deck Cargo Door
- Fuselage structurally reinforced around cargo door
- Dual Vent Door System
- Centerline Seat track added
- Ankra International Cargo Loading System
- 9G rigid cargo / smoke barrier with sliding door
- Main deck converted to Class "E" Cargo Compartment
- Cabin windows replaced with lightweight aluminum window plugs
- High reliability, 28VDC, independent hydraulic system
- Up to 2 Supernumerary Seats

About AEI

Formed in 1958, Aeronautical Engineers, Inc. (AEI) is the oldest conversion company in existence today. For more than 55 years AEI has provided advanced engineering solutions to aircraft owners and operators. Today the company is a global leader in passenger to freighter conversions for a wide array of aircraft, helping customers extend the life of the aircraft and increase the value of their asset. AEI has developed over 120 Supplemental Type Certificates (STCs) and 385 aircraft have been modified with AEI STCs – more than any other conversion provider. www.aeronautical-engineers.com

About Commercial Jet

Commercial Jet, with repair station facilities in Miami Florida and Dothan Alabama specializes in heavy maintenance and modification services, complete airframe inspections, freighter conversions, interior modifications and avionics upgrade programs. Commercial Jet also offer lease return services, refitting passenger and cargo aircraft for return to market. Their professional team services a wide variety of commercial aircraft types, including B717, B727, B737, B757, B767, DC8, DC9, DC10/MD-11, MD80/90, A320 and A300. www.commercialjet.com
